

« L'eau qu'on boit ici, surtout si tu es mupaya (étranger), ça va te faire mal au ventre, mais comme on n'a pas le choix, on s'est habitué. »

« Quand c'est la nuit, tout le monde doit être en alerte et réveillé. Des fois on utilise des sifflets et des marmites pour réveiller les voisins. »

« On n'a pas d'érosions, ni d'inondations mais quand il pleut, après les 30-60 minutes, je ne vais plus pouvoir voir mes chaussures. »

« Près de la rivière Mandona, on voit passer les biens des maisons qui sont emportés. »

« L'eau monte jusqu'à la hauteur de moitié de la porte d'entrée. Et quand ça arrive, on laisse nos affaires et on revient dans 2 ou 3 jours. Pendant ce temps, on loge chez la famille qui habite un peu plus haut, dans une zone pas inondée. »
